

In August of 2008, a reward of \$1 million in gold was offered to vaccine supporters due to [mothers being ostracized by the national news](#) media as irresponsible and a detriment to their community for not having their children vaccinated. After prayerful consideration, it was my intention to send back the opposing, healing energy back to the negative energy and fear-mongering of the media by [announcing the reward](#). At the same time, the reward was intended to wake up the people to the fact that vaccines have been rendered obsolete by new [NASA technology](#) that has been deliberately kept from them. The reward has never been claimed by vaccine supporters.

During the new Vaccine Injury Awareness Month in October of 2010, [the reward was raised to \\$10 million in gold](#). This reward is backed by the top astrophysicist in the world who has tested Bionaid and ZeoHeal. This astrophysicist wishes to remain anonymous and shall remain so, but I will tell you this much, he was extremely instrumental in finding the [Atocha Shipwreck](#), he has worked for kings and leaders of many countries in finding their underground and underwater resources. This reward is authentic.

What does it take to obtain the reward? It is simple. The challenger wishing to obtain the reward must provide all expenses required to test their products against Bionaid™ and ZeoHeal™. Tests will be monitored by professionals representing the challenger, and also those representing Bionaid™ and ZeoHeal™ to keep the testing fair and beyond question. If the challenger proves that their products are more safe and effective than Bionaid™ and ZeoHeal™, they obtain the location to the gold safely and secretly stored away. It is up to the challenger to pick up and transport the gold, it will not be sent to them.

The tests will require a minimum of 50 – 100 patients to be tested in a clinical setting. The clinical tests must meet all the [standards of professional clinical studies required for acceptance by current medical standards](#). If the challenger loses in the attempt to challenge and prove that their product is more safe and effective than Bionaid™ and ZeoHeal™, they must also cover the expenses to have the findings published worldwide and within reason, and give Burk Hale, Incorporated the full rights of ownership to the results of the clinical studies.

At this time and to the best of my knowledge, no product owner and developer has ever issued such a substantial reward backing the superior safety and efficacy of their product, including other dietary supplement owners and developers that have also refused to take me up on this challenge.

Burk Hale, Incorporated

702 Woodgate Road Ringgold, Georgia 30736 Ph. 423-314-6878
