Dear Sir/madam,

MEDICAL REPORT/TESTIMONY

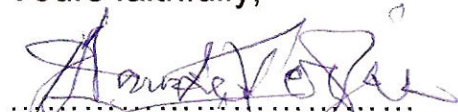

Having received samples of Bion+Bionaid from you, some patients with different types of diseases were selected and Bion+Bionaid were added to their treatment schedules.

The following is the testimony and report of some of them:

1. I am a health worker and diabetic patient. I have been having pains at my joint and experiencing periodic rise in my F.B.S levels. Since adding Bion+Bionaid to my medications, the persistent muscular pains and numbness at my toes has improved and my sugar level is at constant low and I am quiet fine
2. A patient with liver obsesses and distended A.B.D was not responding to treatment after two weeks of medication. When Bion+ Bionaid was added to the medication she was taking, her condition improved drastically. She is now out of danger and has returned to her village about 2 weeks ago. Thanks to Bion+ Bionaid the savior.
3. When Bion+Bionaid was added to the treatment of a patient with suspected respiratory tract infection, his condition improved after 2 weeks. His physical condition now looks better. He no longer coughs, though his treatment continues
4. Bion+Bionaid was added to the treatment of a patient with multiple sores/ulcerations at the toes. After cleaning with Bion+Bionaid added to the gauze covering, the sores healed within a short period.

On the while I think Bion+Bionaid is a good for all purpose household product to have around. I congratulate Mr. Elder Burke Hale III for bringing Bion+Bionaid food supplement to the world.

Yours faithfully,

(Joseph T. Mate-Kodzo)
